is a Jordan chain of length
$$n$$

of Jordan blocks $J_n(n) = g_n$

Find v2 such that

$$(I - A)_{V_2} = V = \begin{bmatrix} -2 \\ 0 \\ 1 \end{bmatrix}$$

$$V_2 = \begin{bmatrix} 0 \\ 1 \\ 0 \end{bmatrix}$$

$$V_2 = \begin{bmatrix} 0 \\ 1 \\ 0 \end{bmatrix}$$

$$V_3 = V = \begin{bmatrix} -2 \\ 0 \\ 1 \end{bmatrix}$$

Similarly, find v3 such that

$$(I - A)_{\gamma_3} = \sqrt{2} = \begin{bmatrix} 0 \\ 0 \end{bmatrix}$$

$$(I - A)_{\gamma_3} = \gamma_2 = \begin{bmatrix} 1 & 1 & 1 \\ 0 & 1 & 1 \end{bmatrix}$$

$$\sqrt{3} = \begin{bmatrix} -1 & 1 & 1 \\ 0 & 1 & 1 \end{bmatrix}$$

$$\sqrt{3} = \begin{bmatrix} -1 & 1 & 1 \\ 0 & 1 & 1 \end{bmatrix}$$

$$\sqrt{3} = \begin{bmatrix} -1 & 1 & 1 \\ 0 & 1 & 1 \end{bmatrix}$$

Then, $\frac{2}{3}$ v_3 , v_2 , v_3^3 is a Jordan chain of length 3 (Lhy?)
